SUMMARY

UiPath RPA Developer with nearly 2 years of experience building enterprise automations at Victoria's Secret & Co. Delivers end-to-end bots across SAP, Salesforce, Outlook, Excel and web applications using REFramework, Orchestrator queues and Document Understanding. Automation work has saved 1,600+ hours of manual effort a year. Also skilled in test automation with Playwright and Selenium, and in API testing with Postman and SQL.

TECHNICAL SKILLS

RPA: UiPath Studio, UiPath Orchestrator, REFramework, Queues, Assets & Credential Manager, Triggers
Intelligent Automation: Document Understanding, OCR, Generative AI, Agentic AI, Prompt Engineering
Application Automation: SAP GUI & SAP Fiori, SAP BOBJ, Salesforce, Excel, Outlook, Web, PDF
Test Automation: Playwright, Selenium WebDriver, TestNG, Page Object Model, Cross-Browser Testing
API & Data: Postman, REST APIs, SQL, Snowflake, MySQL, MongoDB
Languages: VB.NET, C#, Python, JavaScript, TypeScript, Java, C++
Tools: Git, GitHub, Jira, Spira, Jenkins, CI/CD, GitHub Copilot, Claude

EXPERIENCE

Victoria's Secret & Co. — *UiPath Automation Developer (Contract)* **Jan 2025 – Present**

- Design, build and maintain UiPath automations on REFramework that have saved 1,600+ hours of manual effort a year.
- Automate end-to-end business workflows across SAP, Salesforce, web applications, Excel and Outlook for finance and supply-chain teams.
- Deploy and run bots through UiPath Orchestrator using queues, assets, credentials and scheduled triggers.
- Built an email-driven document processing solution with Outlook, Document Understanding and REFramework that reads each request, extracts its data and processes it automatically.
- Resolve production issues by debugging failed runs, fixing selectors and improving exception handling, retries and logging.
- Gather requirements from business users, write process design documents and support UAT and go-live.
- Developed and maintained Selenium, Java and TestNG test scripts for the Active Omni order management platform.

PROJECTS

Intelligent Document Processing (IDP) Bot | *UiPath, Document Understanding, OCR, Orchestrator, Outlook*

- Read incoming Outlook emails and created an Orchestrator queue transaction for each request.
- Extracted PDF data with Document Understanding and OCR, updated Excel trackers, uploaded files to OpenText and sent status emails.

Finance Lease Administration Bot | *UiPath, SAP, SAP BOBJ, Excel*

- Automated SAP rent simulation and validation, merging SAP BOBJ monthly rent reports with simulation data.
- Generated standardized, finance-ready monthly rent analysis reports with audit screenshots in a shared location.

PO Cost Discrepancy Audit Bot | *UiPath, SAP, Salesforce, Excel*

- Automated a weekly PO cost audit, extracting SAP reports by variant and matching PO, CV and comment data from Salesforce.
- Applied business-rule validations to categorize each discrepancy and assign it to the right owner.

E-Commerce Test Automation Framework | *JavaScript, Playwright, Selenium WebDriver, Mocha, GitHub Actions*

- Built a JavaScript framework running end-to-end tests for login, search, cart and checkout with both Playwright and Selenium WebDriver.
- Used the Page Object Model, JSON test data and parallel cross-browser runs, with screenshots, traces and HTML reports on failure.
- Set up a GitHub Actions pipeline that runs the full suite on every push and pull request.

EDUCATION

MCA, Harcourt Butler Technical University (HBTU), Kanpur | *CGPA: 8.54 / 10* **2025**

B.Sc. Computer Science, Bhavan's College, Mumbai | *CGPA: 9.43 / 10* **2022**

ACHIEVEMENTS

- Solved 600+ DSA problems on LeetCode; 5-star rating in Problem Solving and C++ on HackerRank.
- Built a programming blog to 15,000+ monthly visitors at peak, with Google AdSense and Ezoic approval.
